## About Us:

The HANDS in Autism® Interdisciplinary Training & Resource Center's mission To provide unique learning opportunities designed to improve understanding of the process and ability of working with individuals with ASD and a range of other developmental and behavioral challenges through hands-on and coaching experiences and building bridges of information, resources and collaboration across family, educational, medical and community systems.

This is an arts and craft activity in which students can make a turkey with wings and a face for a Thanksgiving/fall activity. The activity works on following a schedule, as well as fine motor skill of gluing.

## MATERIALS NEEDED

- ➔ 2 googly eyes
- ➔ One empty toilet paper roll
- ➔ Yellow, red, and orange construction paper OR print this template out in color
- ➔ White glue, washable
- ➔ Tape (you can choose to glue on the feathers, but may work better with tape)
- ➔ Scissors
- ➔ Writing utensil

## HOW TO PREPARE:

1. Gather all supplies.
2. Print handout.
3. Cut out the colored pieces. If you are making feathers from construction paper, make sure to label feathers 1-7.
4. Prepare check-off schedule.

## OTHER ADAPTATIONS:

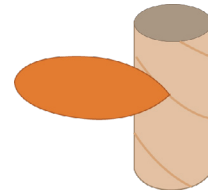

- ➔ This activity could be completed with construction paper instead of printing the activity template.
- ➔ This activity could also be put into an interactive power point that individuals could work through in an errorless learning format.

## MATERIALS PROVIDED ARE EXAMPLES ONLY!

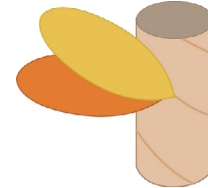

They may need to be individualized to meet the particular needs of a person with an ASD!

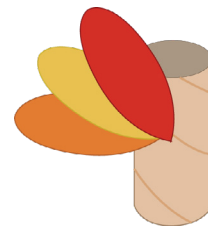

Tape on feather 1

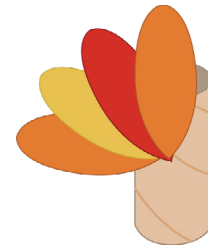

Tape on feather 2

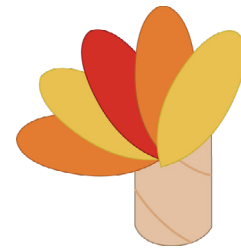

Tape on feather 3

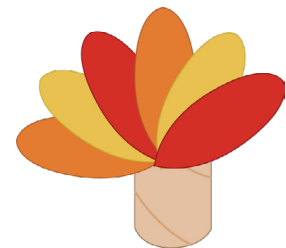

Tape on feather 4

Tape on feather 5

Tape on feather 6

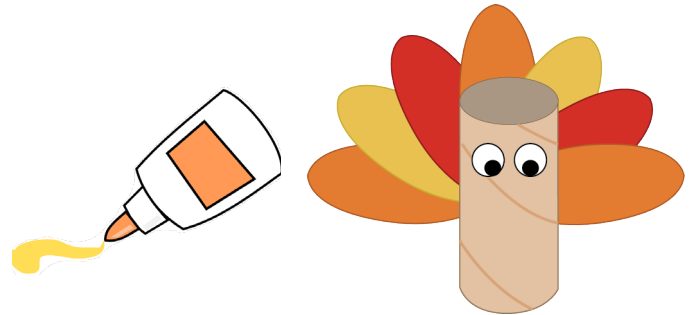

Tape on feather 7

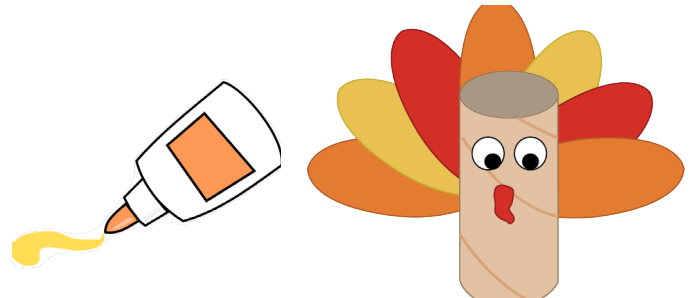

Turn the turkey so feathers are in back

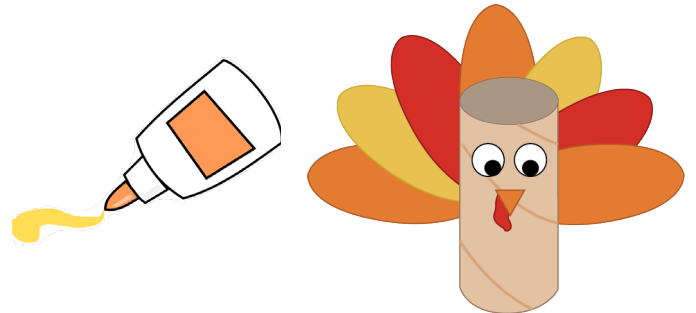

Glue on two eyes

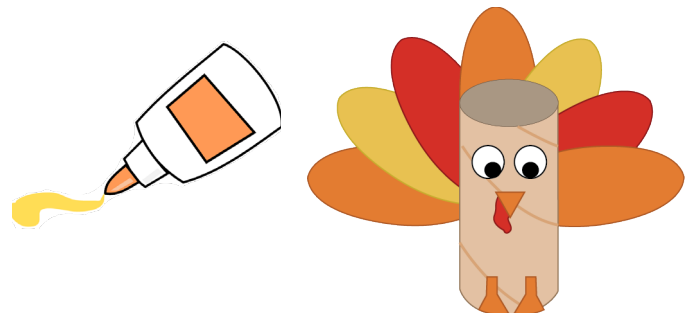

Glue on wattle

Glue on nose

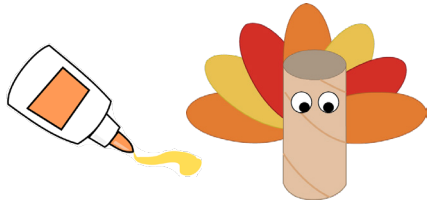

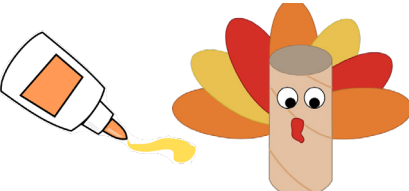

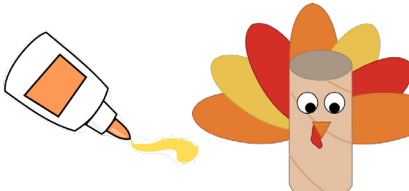

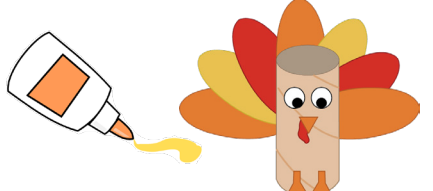

Glue on two feet

Let Dry!
